Software Engineer with experience building web products across financial trading and workforce platforms. Experienced in contributing across product design, frontend, and backend development, with an interest in building practical solutions that balance user needs, business requirements, and maintainable software systems.

Experience

Software Engineer, ODDS · 2025 – Present
Work in a highly structured Scrum environment as part of a prototype team exploring and demonstrating intensive Scrum practices. Contribute to product development across UX/UI, frontend, and backend.

Projects

Gig&Co · Workforce Platform
Contributed extensively to the design and development of a workforce platform connecting employers and workers. Worked across the product lifecycle, from shaping user flows and UX/UI to implementing frontend and backend features. Translated business requirements into product workflows and technical solutions across employer, worker, and operational workflows.

Blocktrade System · Institutional Trading
Contributed to the development and maintenance of a production block trading platform, including frontend features and backend bug fixes. Developed features such as Repeat Order and Iceberg Order.

Tax Saving Management System
Built a web application for tax planning: simulate tax deductions via mutual fund investments and export plans for client presentations.

Real-Time Thailand Election Results Platform
Built a live election dashboard for Thailand's 2026 Prime Minister election, refreshing nationwide results in real time.

Technical Skills

Frontend: React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Ant Design
Backend: Node.js, Go, REST APIs, SQLite, PostgreSQL, MySQL
Tools: Git, Figma, SonarQube, Jest, Playwright, Jenkins
Practices: Agile / Scrum, Clean Architecture, UX/UI, User Research

Education

Bachelor of Engineering in Computer Engineering (Honours)
Suranaree University of Technology · 2021 – 2025 · GPA 3.72
